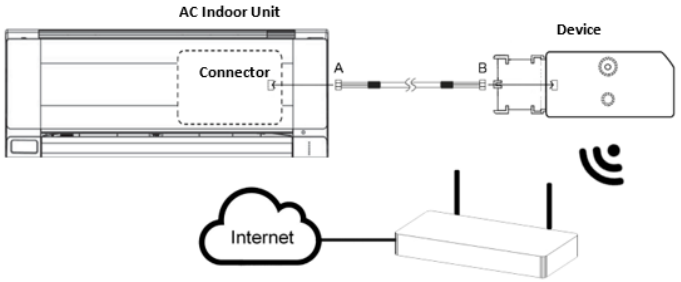
This document describes **how to connect the device to the wireless network**. Check the access point or wireless router where the device will have to be connected and make sure that it is using **2.4GHz and b, g or n mode** for the wireless communication.

For specific information about the wireless access point or router, please refer to their corresponding manuals.

Make sure that the device is close enough to the wireless access point or router so there are no coverage issues.

1

Connect your device to the AC unit according to the instructions of the installation manual.



2

Download the application from Google Play or App Store.

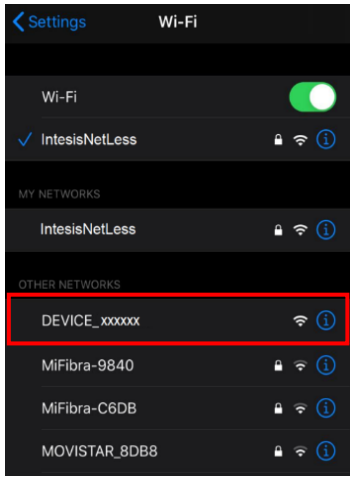
ANDROID APP ON Google play

Available on the App Store

Direct access to download links can be found at:
www.airconwithme.com

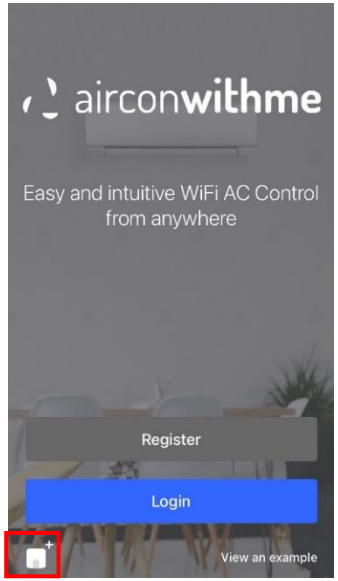
3

Go to wireless settings section of your Smartphone or tablet* and connect to the network generated by your device (DEVICE_xxxxxx).



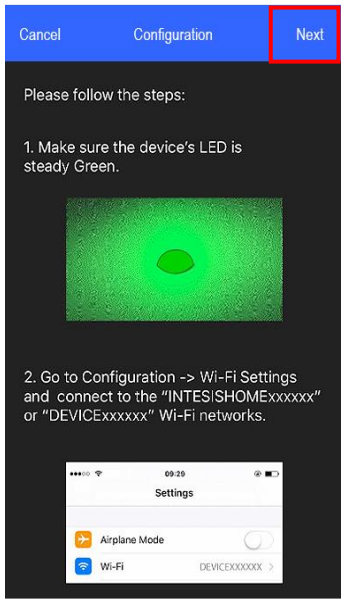
4

Click on the add device Icon. **



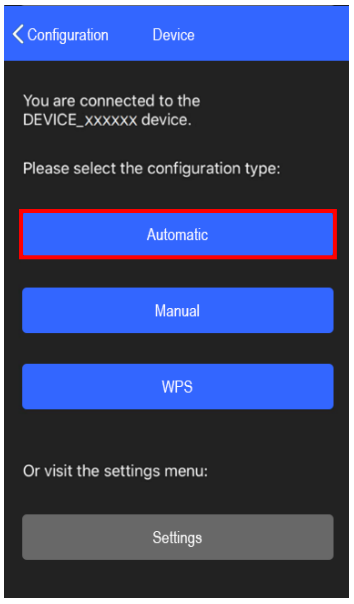
5

Click on “Next”.



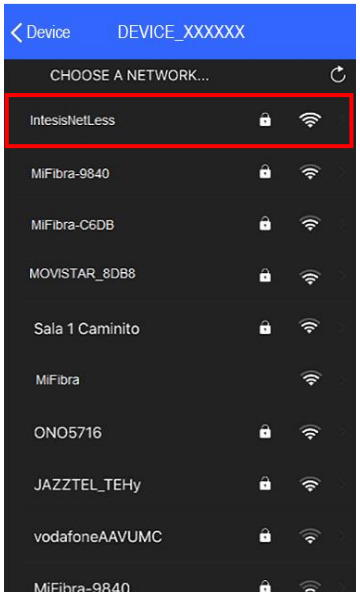
6

Select “Automatic”.



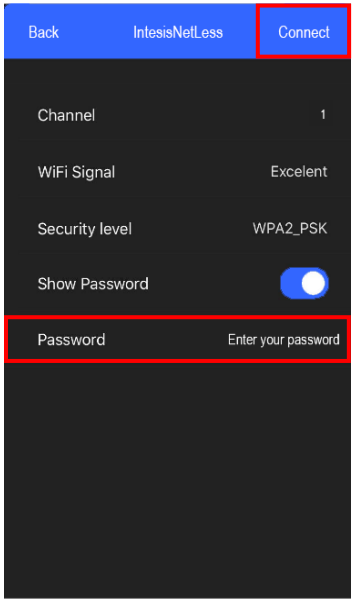
7

Select the wireless network the device will be connected to.



8

Type the wireless network’s password. Tap on “Connect”.



9

Process completed. ***

*For further information about how to enable wireless network settings, please refer to smartphone or tablet manual.
